MH-51-01: Laminar Air Flow (Portable)

Switches	: Switches for blower, Fluorescent light & UV light.
Pre Filter	: 90.00% down to 5 micron.
HEPA Filter	: ISO 14644 Class 5 (Class 100) 99.97%-99.99% down to 0.3 micron. Mesh guard for protection of HEPA Filter.
Airflow	: Top to downward (Vertical)
Noise Level	: 60 decibel \pm 5%.
Velocity	: 0.35-0.50m/sec.
Work Table	: Perforated Made up of stainless steel 304gr. Cock for gas on work table.
Front door	: Made of Acrylic. (Foldable)
UV Lamp	: 9W, make Philips Holland.
Illumination	: 9W, LED tube.
Pressure	: Manometer 0-50mm range.
Power Supply	: 230V \pm 10V/50 Hz single phase A.C.
Cabinet	: 19mm thick Plyboard covered with sunmica from outside and epoxy painted from inside.
Heavy Duty Blower	: Dynamically balanced with 0.25 HP Electric Motor Mounted on anti vibration pad 1440rpm motor.
Working Area Size	: 45x45x45cm.

MH-55: HEPA Filter

The filter has excellent resistance to chemical including corrosive vapour and most acids except phosphoric and hydro solvents which have little or no effect. These have excellent electric qualities, they neither absorb moisture, swell, stretch nor undergo chemical change through contact with moisture. Filter medium fabricated from fire proof 100% micro fibre glass paper pleated with aluminium /cadmium plated mild steel with exclusive plastic base adhesive. Continuous neoprene sponge rubber seals are provided on filter frame for effective sealing . The filter has a filtration efficiency of upto 99.97%, particle retention >0.3 micron and can operate in temperature upto 150° C intermittent 121° C continuous and 100% relative humidity. The filters are tested by the DOP test methods, the most accurate and stringent test.

- MH-05-01 HEPA Filter Size : 60x60x15 cm.
- MH-05-02 HEPA Filter Size : 90x60x15 cm.
- MH-05-03 HEPA Filter Size : 120x60x15 cm.

Clean Air Equipment

Pre Filter

These filters have been specifically designed to meet the requirements of clean air in general ventilating and air-conditioning systems in Hospitals, Computer installations, also in Nuclear, Pharmaceutical, Petro-Chemical, Fertilizers, Synthetic fiber industries and Compressor applications. The heart of the filter is a reinforced washable synthetic non-woven filter media/fiber glass. Fiber media pleated in accordion format along with a backing of wire/HDPE netting. The mediums are carefully selected to offer the best possible performance to suit specific needs. In order to obtain uniformity of dust loading, the filter plates are kept apart by means of aluminium separators. The complete filter pack is sealed into rigid cassette of mild steel or aluminium. Filter is offered in a three piece construction namely element cassette, outer casing and front grill. For replacement, only the cassette element needs to be changed. The micron fine filter has a filtration efficiency upto 90.0%, particle retention >5.0 micron and can operate upto 120°C and 100% relative humidity. Before use, the filters are tested in accordance with the specification of BS 2831 Standards.

MH-57-10 : Laminar Air Flow IVF (In Vitro Fertilization Workstation)

The Rescholar IVF workstation is specially designed for use in fertility laboratories for research work in the fields of human and animal reproduction. A controlled work environment is of high priority due to the complexity of the process. This includes hygienic conditions to minimize microbial contamination, a warmed work surface for the sustenance of biological matter and provisions for the use of microscopes in the Rescholar IVF workstation, air is taken in from above the workstation and passed through an ULPA filter. The filtered air is then passed through the main chamber in a vertical laminar (Unidirectional) air stream before being exhausted through the front opening.

Features

- Warmed work top keeps temperature at a constant $37^{\circ}\pm 0.4^{\circ}\text{C}$ (32.7°F). Work top temperature is constantly displayed on the front panel, and temperature is easily adjustable from the controller.
- The workstation interior is constructed of stainless steel, making the work zone easy to clean. The interior surface will not chip, rust or generated particles.
- The ergonomically designed work surface with a curved front edge is designed for maximum operator comfort.
- High quality ULPA filters use an improved mini-pleat separation technique to maximize surface area.
- Rescholar IVF workstation provides ISO Class 3 air cleanliness within the zone.
- Working Area Size 120x60x60cm.

MH-60: Fume Hood (Stainless Steel)

The work surface of granite is fitted with small wash basin & good quality tap. A gas cock is also fitted. Sliding sash made of polycarbonate / toughened glass moves vertically up and down with concealed counter balanced weights. Chamber is fitted with fluorescent light assembly. Space underneath the work surface is provided with storage compartment. 15/5 Amp socket with switches is provided for light and exhaust system. Supplied with cord and plug to work on 220 volts 1/3 phase 50Hz A.C. Complete with motor blower for exhaust system and Duct to take out fumes.

Fume Hood (Stainless Steel) Frame of S.S. 304 grade from outside & 316 grade inside.

- Made of Stainless Steel.
- Granite Working Platform.
- High Speed Centrifugal Blowers.
- Front Sash with counter weights.
- LED illumination lights.
- Water tap and PP sink.
- Provision for gas and air Connection storage cup board.
- 15/5 Amp Switches and Socket

MH-60-12 Demonstration Fume Hood

Demonstration Fume Hood offer a low-cost solution for protection of students, teachers, and the environment during chemistry experiments. Demonstration Fume Hood provides exceptional protection from generating toxic fumes. Vapours, particulate, or smoke. Structure made of mild steel and powder coated paint finish. Worktop of granite and fitted with PP sink & water tap. Gas cock provided on top. High speed exhaust system fitted on top. Front door open able & all three side fitted with transparent sheet. Illumination & 15/5 amp socket provided. Storage space for chemical etc. under the workbench. Working Area Size : 90x60x60cm

Fume Hood Stainless Steel with Digital Air Flow Monitor and Exhaust System

Design Structures	: Aerodynamic, floor mounted
Air flow type	: Automatic bypass type
Construction (Exteriors)	: Available in two options :-
(A)	: Stainless Steel 304gr. Outside & 316gr. S.S. Inside.
(B)	: Epoxy powder coated 18 & 22 Gauge Galvanized steel structure.
Baffle arrangement	: 2 Point suction section with baffle to ensure smooth and immediate exhaust of fumes. As per ASHRAE & EN norms.
Airfoil	: Flush powder coated airfoil mounted on the worktop.
Worktop	: Available in following options
(A)	: Chemical resistant splash & spillage proof jet black granite worktop. Sink, water tap with drain arrangement worktop fitted with oval shaped 100x200mm PP cup-sink for drainage.
(B)	: Epoxy top
(C)	: Stainless Steel 316gr.
Sash (Shutter)	: Vertical Sliding counter balanced toughened glass (5mm thick) / Polycarbonate fitted in the powder coated Aluminum. Clear sash open height =500mm-675mm according to size & Fume Hood.
Service Fittings	: Remotely operated colour coded (as per international standard) total three services valves with SS braided flexible hose & brass fittings (1 for water & 2 for gases)
Lighting	: LED Light for better illumination with less power consumption.
Electrical utilities	: Four nos electrical sockets 15/5 amp & switches, 'North West / HAVELLS make \ 50Hz switches have LED to indicate ON position. Switch for blower & tube light. LED indicators to show ON position of switches to be provided. Control panel provided with starter for blower.
	• Complete rigid structure to support fume hood.
	• Double skin shutter with self closing hinges.
Digital Air Flow	: This device is an accessory for fume hood to indicate the approximate face velocity of airflow with primary purpose of warning when a low flow condition occurs. Red & LED's correspond to low & normal flow rates. When flow decreases from normal to low an audible alarm will also actuate requiring manual acknowledgment for silence.
Centrifugal Blower	: Silent high efficiency blower, consisting of continuous rating motor and chemical resistant impeller. The blower designed to give face velocity of 80 to 120 feet/minute (FPM) as per ANSI/AIHA Z9.5 at the safe working height.
Air suction capacity	: Silent 650 CFM confirming to international face velocity norms and a per fume hood airflow pattern.

Insect Storage/Entomological Equipment

Mobile Insect Storage System

An all new 'VERSATILE' space efficient, elegant looking, sturdy and compact system for insect storage supported with care, safety-privacy vis-à-vis being compact to accommodate large quantity in less space, easy to handle, convenient to monitor-sort.

The system contains Compactor units which can be arranged to suite your requirements, according to the space available and above all can be secured with a single lock.

The metallic compactor units made of mild steel with powder coated paint finish can be moved for handling the specimens and again joined to be locked only on the end unit and all units are secured. Showcases are arranged in rows of 20 each with two rows in each unit. End units are for 40 showcases whereas the intermediate units accommodate showcases back to back, i.e., 80 showcases and again the end unit for 40 showcases.

Intermediate units can be increased as per space requirement.

There are options for showcases, metallic or wooden. Size options of 53x45x7.5cm. or 45x45x7.5cm. or 45x30x6.5cm. with pinning EVA sheet is base, provision for insecticide, puller knobs, index card holder etc.

Insect Storage/Entomological Equipment

VERSATILE INSECT STORAGE SYSTEM.

Consists of four numbers of optimizers placed together. Anyone of the four can be moved to make space between two optimizers. Inside each optimizer, racks are provided for storing 40 numbers of insects showcases of size 53x45x8cm. or 45x45x7.5cm. or 45x30x6.5cm. arranged in two vertical rows. In middle optimizers, storage space in back to back, i.e., middle optimizers are for 80 showcase each and side optimizers for 40 showcases each. Optimizer body is in rigid knock down construction. Made of CRCA sheet and powder coated with epoxy polyester powder. Provided with Sliding glass doors. Undercarriage is a welded frame of HR sheet. Bodies are bolted to undercarriages and these move on channels. Centralized all the units are brought together.

Showcase of MDF with plywood bottom and removable glass top in lined with 8mm thick EVA sheet and is glazed white from inside. Wooden batons with provision for insecticide fitted inside showcase. Glass top frame designed to make box air tight and pest proof. Fitted with index card holder and puller knobs.

2. For Pinning of Insects on Bottom. White hardwood Teakwood with glass in wooden frame on top & MDF Sheet bottom is nicely polished. Bottom lined with 8 mm thick soft pinning, washable EVA Sheet. Inside glazed white. Raised wooden wall with holes for insecticide inside bottom to make box air tight and pest proof. Fitted with brass hinges, index card holder & clips.

3. For pinning of insects both inside top & bottom. White hardwood Teakwood frame with melamine lamination on top & MDF sheet bottom is nicely polished. Top & bottom lined with 8 mm thick soft pinning, washable EVA Sheet. Inside glazed white. Raised wall with holes for insecticide inside bottom to make box air tight and pest proof. Fitted with brass hinges, index card holder & clips.

MI-66-01 : Insect Box with Stretching Strips

Suitable for taking in field where the insects can be stretched on the spot and can securely be kept inside the box white hardwood/Teakwood frame with melamine lamination on top & MDF sheet bottom is nicely polished. Top & Bottom lined with EVA sheet over which adjustable strips provided for stretching insects. Strips can be fixed at one place with fine screws and fly nuts. Fitted with brass hinges, index card holder, clips and handle. Size Approx : 43x30x11cm.

MI-67-01 : Insect Stretching Board (Adjustable)

Board adjustable along the support to obtain desired width for different size insects. Board top & groove fitted with 8mm thick EVA sheet. Groove adjustable from 0 to 12mm with the help of fine fly-nuts. Material used is White hardwood / teakwood and finished in natural color polish. Size : 35 x 12 cm.

MI-68-01 Insect Activity Recorder

Automatic Video tracking System in workspace of 1m² with USB image Processing System and Video tracking Software
OPTIONAL : Desktop PC.

MI-68-02: Insect Growth Chamber

insect growth chambers provided the ideal environment to stimulate a variety of entomological studies in medium and high volumes. With its wide temperature range of 5°C to 70°C and humidity range from 20% to 98% RH the Insect growth Chambers offer reliable results for insect rearing experts in numerous fields and disciplines. Standard features are incorporated in the design to support insect rearing such as an interior comprised of corrosion-resistant stainless steel that is easily removed without tools for routine cleaning or re-configuration. Insect Growth chambers come standard with phenolic coated coils, protecting interior components and contributing to a long operating life because most insect growth studies, such as the rearing of the fruit fly, create acidic secretions.

insect growth chambers come in Different sizes to accommodate medium to high volume applications. They are designed to take up a minimal footprint, allowing the user to most efficiently take advantage of the laboratory floor or bench space. These chambers are carefully engineered to be energy efficient to help lower operating costs.

Temperature Range	5°C to 70°C
Temperature Control	±0.1°C
Temperature Sensor	3-wire RTD
Humidity Range	20 to 98% RH
Humidity Control	±2% RH

MI-72-04 : Sorting Tray, Plastic

For sorting specimens of same population for individual examination.
Made of moulded polystyrene.
Cap. 96 wells

MI-72-05 : Teasing Needle, Straight (S.S.)

MI-72-06 : Teasing Needle, Bent (S.S.)

MI-72-07 : Insect Killing Jar

500ml Glass Jar with bakelite screwing cap and absorbent plaster in base, without chemical.

MI-72-08 : Altimeter.

Round, dial type, range 0-5000 meters.

Insect Storage/Entomological Equipment

MI-72-11 : Aspirator

Polycarbonate vial with cap. Two Clear tubes, one straight and one bent, Rubber tubing on straight tube for sucking purpose.

MI-72-12 : Insect Specimen Mailing Box

Card-board box covered with white glazed paper provided with EVA sheet in base for pinning of insect specimens. Top pull removed. Size : 15x10x5cm.

MI-72-13 : Dissecting Tray

Dissecting Tray with wax or 8mm EVA Sheet
Size : 30x23x5cm.

MI-72-14 : Dissecting Kit

With dissection tools like Forceps. Scissor, Magnifying glass, Needle, Spatula, Surgical blade, Handle.

MI-73: Entomological Pins (Imported)

Pack of 100 Pins Approx. Available in different sizes:-

No. 000	Size 0.38 x 0.25mm

Minuten Pins

MI-73-01 : Entomological Pins (Black Enamel Coated)

MI-73-01A : Entomological Pins (S.S.)

MI-73-02 : Insect Pinning Block, Step type

Made of hardwood with holes at 25mm, 12mm & 7.5mm.

Insect Storage/Entomological Equipment

MI-73-03 : Entomological Pin Storage Block, Round Type

Round, hardwood block with eight holes for pins.

MI-73-04: Curator Block

Hardwood block with provision for keeping insect pins, labels, points and other small tools. Bottom section having holes for pins and block section has holes for forceps, scissors etc.

MI-73-05 : Pin Vice

Hardened steel, length approximately 90mm, to hold insect pin with diameter 0-0.40mm. Very useful for dissection under microscope.

MI-74 : Insect Light Trap

Made of mild steel, well painted. With a box at the bottom for placing killing bottle/ tray. Length of funnel 30cm, diameter of funnel at the tail end 5cm, Size of box 40x40x25cm. Funnel coming into box for convenient collection of trapped insects into the tray. Provided with a shade to cover the whole equipment. Supports for stout construction and 5 meter long electric cord.

- MI-74-01 Insect Light Trap with Electric Bulb
- MI-74-02 Insect Light Trap with Electric Bulb & Battery
- MI-74-03 Insect Light Trap with 10 watt CFL Tube
- MI-74-04 Insect Light Trap with CFL Tube & Battery
- MI-74-05 Insect Light Trap with 15 watt U.V.Tube
- MI-74-06 Insect Light Trap with U.V.Tube & Battery

MI-74-08 : Insect Light Trap (Barles Type)

Funnel tip inner side provided with wire mesh over which wet soil containing insects is kept. Electric bulb provided to dry the soil. Height of bulb adjustable. A bottle is provided below the funnel for collection of insects.

MI-74-09 : Light Trap for Moth with Mercury Bulb

Made of mild steel with a box having holes in bottom. Funnel over box to guide trapped Moth into the box. Tray provided under the box for collection of trapped moth. Mercury bulb provided on top of the funnel.

Insect Storage/Entomological Equipment

MI-74-11 : Trap for Fruit Flies
